BLANK PAGE

Preface

The data contained in this report represent the complete count of employment and wages for workers covered by unemployment insurance programs during 1983. State employment security agencies assemble these data from reports filed by employers and tabulate them by industry. The Bureau of Labor Statistics compiles data on a national basis, by State, and by industry. Coverage extends to all States, the District of Columbia, Puerto Rico, and the Virgin Islands.

Material in this publication is in the public domain and, with appropriate credit, may be reproduced without permission.

This bulletin was prepared in the Office of Employment and Unemployment Statistics under the direction of Brian MacDonald, Chief of the Division of Occupational and Administrative Statistics. Joseph C. Bush assisted in the preparation of the bulletin. Data were prepared and processed by Jerry Trach, Rex Tharp, and Charles B. Lieman in the Division of Federal/State Periodic Surveys, Elaine Chen-Nash, Chief. The tables were photocomposed and were developed through the Table Producing Language (TPL) System.

Introduction 1

Tables:

1. Total coverage (UI and UCFE) by ownership: Reporting units, employment, and wages, annual averages 1975-83 2
2. Private industry by 4-digit SIC industry and government by level of government, 1983 annual averages: Reporting units, employment, and wages, change from 1982 3
3. Total coverage (UI and UCFE) by State, 1983 annual averages: Reporting units, employment, and wages, change from 1982 25
4. Private industry by State, 1983 annual averages: Reporting units, employment, and wages, change from 1982 26
5. Private industry by State and 4-digit SIC industry: Reporting units, employment, and wages, 1983 annual averages 27
6. State government by State and selected industries: Reporting units, employment, and wages, 1983 annual averages 508
7. Local government by State and selected industries: Reporting units, employment, and wages, 1983 annual averages 512
8. Federal Government by State and selected industries: Reporting units, employment, and wages, 1983 annual averages 517

Characteristics and uses of the data 520

BLS regional offices and cooperating State agencies (inside back cover)

Introduction

This publication presents 1983 annual data on employment and wages based on the 1972 *Standard Industrial Classification (SIC) Manual* as amended by the 1977 supplement. The data relate to workers covered by unemployment insurance (UI) laws and Federal civilian workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. The data for both private and public workers are reported to BLS by the employment security agencies of the 50 States, the District of Columbia, Puerto Rico, and the Virgin Islands.

For 1983, employers in private industry provided State employment security agencies with quarterly tax reports on monthly employment and quarterly total and taxable wages and contributions for an average of 74 million wage and salary workers in 5 million reporting units. Similar reports on monthly employment and quarterly wages were submitted by the Federal Government for 2.9 million civilian employees, by State governments for nearly 3.6 million employees, and by local governments for slightly over 9 million employees. These reports cover about 98 percent of total wage and salaried civilian employment and provide a virtual census of employees and their wages for nearly all sectors of the economy. The principal exclusions from UI and UCFE coverage are cited in "Characteristics and Uses of the Data," which follows the tabulations.

Data presented in the tabulations are by industry, State, and ownership, and include the average number of reporting units, annual average employment, total wages, and annual and average weekly wages per employee.

This publication contains national totals for all UI/UCFE covered employment and wages for 11 broad industry divisions, 84 major industry groups, and almost all of the 1,005 four-digit SIC industries. Private sector data are presented by State, for the divisions and four-digit SIC industries. State, local, and Federal Government data are presented for selected industries.

Most State agencies have UI/UCFE covered employment and wage data for both the private and government sectors by county and for important local labor market areas. Requests for such detail should be made directly to the State agency listed on the inside back cover of this publication.

Table 1. Total coverage (UI and UCFE) by ownership: Reporting units, employment, and wages, annual averages 1975-83

Year	Average reporting units	Annual average employment	Total annual wages (in thousands)	Annual wages per employee	Average weekly wage

[1] Includes data for 4-digit industries not shown separately. This exception to 4-digit industry data is made because adequate respondent records are not available on a uniform basis.

[2] Most railroad employees are covered by unemployment programs under the Railroad Retirement Act and thus not included in this bulletin.

[3] Includes data for international or foreign government ownership, not shown separately.

^ Indicates data do not meet BLS or State agency disclosure standards.

nec = not elsewhere classified.

NOTE: Detail may not add to totals because of rounding.

---

[1] Includes data for 4-digit industries not shown separately. This exception to 4-digit industry data is made because adequate respondent records are not available on a uniform basis.

[2] Most railroad employees are covered by unemployment programs under the Railroad Retirement Act and thus not included in this bulletin.

[n] Indicates data do not meet BLS or State agency disclosure standards.

nec = not elsewhere classified.

Dash = zero reporting units, employment, or wages.

NOTE: Detail may not add to totals because of rounding.

Characteristics and Uses of the Data

Characteristics

The statistics in this publication are compiled from the quarterly tax reports submitted to State employment security agencies by employers subject to State unemployment insurance (UI) laws and Federal agencies subject to the Unemployment Compensation for Federal Employees (UCFE) program. The State agencies compile the data which are then summarized for the Nation by the Bureau of Labor Statistics. These covered employment and wages data, also called the "ES-202" series, represent all 50 States, the District of Columbia, Puerto Rico, and the Virgin Islands.

Unemployment insurance laws and coverage

Initially, in 1938, the Federal Unemployment Insurance Tax Act applied only to firms employing at least eight persons for a minimum of 20 weeks in a calendar year and excluded certain categories of workers. Amendments to Title XV of the Social Security Act—the program of Unemployment Compensation for Federal Employees—extended coverage to Federal civilian employees effective January 1, 1955, and to workers in firms employing from four to seven workers effective January 1, 1956.

On January 1, 1958, the Unemployment Compensation for Ex-servicemen (UCX) program superseded earlier temporary programs for veterans, bringing under coverage a significant portion of the men and women who had served in the Armed Forces.

Federal legislation, effective January 1, 1972, extended coverage of State unemployment insurance systems in 28 States to firms employing one or more workers and expanded some of the statutory coverage provisions. The remaining States had previously extended coverage to these small employers. In 1972, legislation also brought coverage to employees of State hospitals, colleges, and universities.

The Federal Unemployment Compensation Amendments of 1976 incorporated major changes in State unemployment insurance laws effective January 1, 1978. Under the Federal Unemployment Tax Act (FUTA), States expanded coverage to include nearly all remaining State and local government employees, employees of nonprofit elementary and secondary schools, and many agricultural and domestic workers. Some States began implementing the amendments as early as 1976. The law also brought the Virgin Islands under the UI system.

Under a 1981 Supreme Court ruling, church-chartered schools are not required to be covered under the UI system. However, many of these schools continue to cover their employees on a voluntary basis. Special provisions for railroad workers are made through the Railroad Unemployment Insurance Act. The data reported for the UCX and Railroad Retirement Board programs are excluded from the tables in this publication.

Over the years, many States have legislated unemployment insurance protection for additional categories of workers above the base established through Federal legislation. Details on coverage laws are provided in *Comparison of State Unemployment Insurance Laws,* available upon request from the Employment and Training Administration of the Department of Labor.

Comparisons between one State and another should take into consideration the differences in laws between States. When UI-covered private industry employment data are compared directly with other employment series, the industry exclusions also should be taken into account. Excluded from private sector coverage in 1983 were approximately 0.3 million agricultural employees, 1.6 million self-employed farmers, 7.3 million self-employed nonagricultural workers, 1.1 million domestic workers, and 0.7 million unpaid family workers. Also excluded from industry detail tables in this publication were 1.7 million members of the Armed Forces stationed in the United States, and 0.4 million workers covered by the railroad unemployment insurance system. In addition, 0.6 million State and local government workers were not covered by unemployment compensation laws.

UI/UCFE covered employment

In general, UI/UCFE covered employment data represent the number of workers earning wages during the pay period including the 12th of the month. The pay period varies, but intervals common to many employers are 7 and 14 days; other employers pay on a semimonthly or monthly basis. An employer who pays on more than one basis (such as production employees weekly and office employees biweekly) reports the sum of the number of workers on each type of payroll for the appropriate period.

Workers are reported in the State where their jobs are physically located. Covered private industry employment includes most corporation officials, executives, supervisory personnel, clerical workers, wage earners, piece workers, and part-time workers. It excludes proprietors, the self-employed, unpaid family members, and certain farm and domestic workers.

Persons on paid sick leave, paid holiday, paid vacation, etc., are included. Persons on the payroll of more than one firm during the period are counted each time they are reported. Workers are counted even though, in the latter months of the year, their wages may not be subject to the unemployment insurance tax. The employment count excludes workers who earned no wages during the entire applicable pay period because of work stoppages, temporary layoffs, illness, or unpaid vacations.

Employment data reported for Federal civilian employees are a byproduct of the operations of State employment security agencies in administering the provisions of Title XV of the Social Security Act—the program of Unemployment Compensation for Federal Employees. These data are based on reports of monthly employment and quarterly wages submitted each quarter to State agencies for all installations of Federal agencies having employees covered by the act, except the Central Intelligence Agency and the National Security Agency, which are omitted for security reasons.

Employment for any given month for all Federal agencies except the Department of Defense is based on the number of persons on the payroll for the period including the 12th of the month. Installations of the Department of Defense include persons employed on the last workday of the month plus all intermittent employees—occasional workers who were employed at any time during the month.

Reporting units and employment size

Reporting units are, for the most part, individual establishments. An establishment generally is defined as a single physical location at which one, or predominantly one, type of economic activity is carried on. Most employers covered under the State UI laws operate only one place of business. Multi-unit employers having establishments in more than one county, or classifiable in more than one four-digit SIC industry, are requested to submit a separate report for each county and industry. Employers having a total of fewer than 50 employees in all secondary counties or industries, however, may combine these units with the primary county or industry report.

In the Federal Government, the equivalent of a reporting unit is an "installation" (a single physical location) and the equivalent of an employer or firm is the organization of which the installation is a part, i.e., the department, agency, or instrumentality responsible for an activity of government. The Federal agencies currently report data separately by installation. This type of reporting permits the grouping of the data by political subdivisions below the State level, i.e., county, metropolitan area, etc. However, a few agencies with scattered offices within States submit statewide reports, as permitted by UCFE regulations of the Secretary of Labor.

First-quarter reports for 1983 tabulate reporting units into nine size categories ranging from three or fewer employees up to 1,000 employees or more. The size-of-unit data are valuable for certain analyses, as, for example, in determining the proportion of new jobs attributable to small businesses. Size-of-unit tabulations are available upon request from the Bureau of Labor Statistics.

Wages

Total wages. Covered employers in most States report total compensation paid during the calendar quarter, regardless of when the services were performed. A few State laws, however, specify that wages be reported or based on when services are performed rather than when compensation is paid. Under most State laws or regulations, wages include bonuses, the cash value of meals and lodging, and tips and other gratuities.

Covered employer contributions for old-age, survivors, disability, and health insurance (OASDHI), unemployment insurance, workers' compensation, and private pension and welfare funds are not reported as wages. On the other hand, employee contributions for the same purposes, as well as money withheld for income taxes, union dues, etc., are reported even though they are deducted from the worker's gross pay.

Wages of covered Federal workers represent the gross amount of all payrolls for all pay periods ending within the quarter. This includes cash allowances, the cash equivalent of any type of remuneration, severance pay, withholding taxes, and retirement deductions. Federal employee remuneration generally covers the same types of services as for workers in private industry. Depending on the method used by the Federal agency in preparing its quarterly summary balance (cash or accrual basis), the gross amount of payrolls is either paid or payable.

Average wages. Average annual wages per employee for any given industry are computed by dividing total annual wages by annual average employment. A further division by 52 yields average weekly wages per employee. Because of rounding, annual wages per employee and average weeky wages, computed from other data presented in the tables, may differ from the average data shown in the tables, which were computed from the unrounded figures.

The user should be cautious in using weekly wage data for a number of reasons. For example, industries characterized by high proportions of part-time workers will show average weekly wage levels appreciably below the actual weekly earnings levels of regular full-time employees in these industries. The opposite effect characterizes industries with low proportions of part-time workers, or industries which typically schedule heavy weekend and overtime work. Average weekly wage data also may be influenced by work stoppages, labor turnover, retroactive payments, seasonal factors, bonus payments, etc.

Industrial classification

Employment and wage data have been classified by industry since 1938. Industry codes are assigned by State agencies to each reporting unit based on the "nature-of-business" information employers submit. The objective is to have each place of business coded on the basis of its principal activity. If a firm in private industry or a government agency conducts different activities at its various establishments or installations, separate industry codes are assigned, to the extent possible, to each establishment.

Data are classified into 971 four-digit, 420 three-digit, and 84 two-digit industry groups in accordance with the *SIC Manual*. The *Manual* provides for 1,005 four-digit industries, but of these, 34 are coded in the ES-202 program only to the three-digit level, because of difficulty in obtaining systematic and accurate four-digit information from employers.

Disclosure restrictions

In accordance with BLS policy, data provided to the Bureau in confidence are not published and are used only for specified statistical purposes. BLS withholds publication of UI/UCFE covered employment and wage data for any industry level: (1) which consists of fewer than three reporting units; or (2) in which a single unit accounts for 80 percent or more of the industry's employment. A State also may request that data be withheld for any industry level for which the above criteria would not protect the identity of cooperating employers. The totals of all industry levels for the States and the Nation include the nondisclosable data suppressed within the detailed tables. These totals cannot, however, be used to reveal the suppressed data.

Estimated data

To reduce the effect of data excluded because of late reporting by covered private and government employers, State agencies estimate employment and wages for such employers and include them in each quarterly report. Corrections to data which may be entered after a report is filed will include replacement of estimates with reported data to the extent available. Estimates are prepared for the individual reporting unit based on data reported for the preceding quarter and trends in employment reported by employers and installations in the same industry. Information obtained from other sources also is used. If an account remains delinquent for more than one quarter, and research shows that it is still active, the reporting unit will be estimated again.

Comparison of UI and UCFE covered employment data with other series

County Business Patterns. The UI/UCFE covered employment differs from employment included under the Federal Insurance Contributions Act (Social Security) as published in *County Business Patterns* (CBP) in the following major areas: (1) CBP data exclude administrative and auxiliary units from "operating" units data at the four-digit level and include these data at the industry division level only. UI/UCFE covered employment, on the other hand, includes these data at the four-digit SIC level. (2) CBP excludes data for the Virgin Islands and Puerto Rico from totals but makes available a separate volume for Puerto Rico. UI/UCFE covered employment data include both of these areas in detail and totals. (3) CBP excludes agricultural production workers and household workers, some of whom are included in UI/UCFE covered employment data. CBP also excludes government units, all of which are included in UI/UCFE covered employment. (4) CBP counts units for any quarter of a year if they were active (had positive payroll) during the fourth quarter of the same year. Newly identified units are included. UI/UCFE covered employment counts reporting units that were active (reported employment) during any of the previous eight quarters, plus newly identified units, less those known to be out of business. (5) Every five years, data are collected for all multi-units and included in the CBP for that year. Updates for multi-units are obtained from the sample selected for the Annual Company Organization Survey and data for non-sample multi-units are estimated. Updates for single units come from Internal Revenue Service (IRS) and Social Security Administration reports. UI/UCFE covered employment, on the other hand, includes data collected from all units each quarter.

Economic censuses. Information for complete censuses, such as the Census of Manufactures, the Census of

Mineral Industries, and the Census of Business, is obtained from establishments, and the concepts of industry employment are similar to those in the UI/UCFE covered employment reports. Major differences between the programs are: (1) The Economic Censuses for the most part report data for operating establishments. However, the Census of Mineral Industries includes data for auxiliary units at all levels. An economic census supplement is published to report data for administrative and auxiliary units. The supplement shows national data by varying industry levels (primarily two-digit SIC) and State data by industry division. (2) The censuses of manufactures, minerals, and construction count establishments active during any quarter of the year. The Business Census, on the other hand, uses the fourth quarter payroll, as does the CBP. The manufacturing, minerals, and construction censuses' establishment data also tend to closely correspond to the UI/UCFE establishment counts, whereas the Business Census industry data tend to deviate somewhat from UI/UCFE data. (3) The economic censuses of manufactures, minerals, and construction report average employment for the four quarters. The Business Census reports March 12 employment. The UI/UCFE data in this publication reflect annual average employment based on 12 months, but data are available on a monthly basis. (4) The economic censuses are conducted every five years while UI/UCFE covered employment data are collected quarterly. (5) The economic censuses include directly collected data for all multi-units and for most single units. Data for remaining small single units are collected from IRS forms, which provide less detailed information. UI/UCFE covered employment includes data for all multi-units and single units collected quarterly by the States. (6) Census totals are for the United States only; a separate publication provides data for Puerto Rico, the Virgin Islands, and Guam. UI/UCFE totals include Puerto Rico and the Virgin Islands but not Guam. (7) The economic censuses exclude data for some industries such as schools, agricultural services, labor unions, and religious organizations; and exclude almost all of the industry groups of finance, insurance, real estate, transportation, communication, and public utilities. UI/UCFE covered employment includes most of the workers in these industries except for most railroad workers and some employees in nonprofit institutions.

Census of agriculture. Like the economic censuses, the agricultural census is conducted every five years, and, since 1982, in the same year as the economic censuses. The agricultural census covers agricultural production only, and excludes agricultural services, forestry, fishing, and trapping. The UI/UCFE series, by comparison, covers all employment in agricultural industries except part of agricultural production. The agricultural census counts all farm units. Unlike the UI/UCFE program, however, the agricultural census does not use the establishment concept, or base classifications on the *SIC Manual.*

Census of Governments. The Bureau of the Census collects data on Federal, State, and local government workers. These data differ from UI/UCFE covered employment data as follows: (1) The Census of Governments is conducted every five years, in the same year as the economic censuses. During interim years a sample of State and local government and only a small amount of Federal Government data are collected. The UI/UCFE covered employment is collected on a quarterly basis for all units. (2) The Census of Governments includes data for the United States only, while the UI/UCFE coverage also includes data for Puerto Rico and the Virgin Islands. (3) The Census of Governments uses an October reference period, whereas the UI/UCFE data have monthly reference periods for employment and quarterly reference periods for wages. (4) The Census of Governments is not establishment or installation based; instead, units typically represent agencies at the county or township level. The UI/UCFE, to the extent that reports are available, collects data at the establishment level. (5) The Census of Governments does not follow the standard industrial classification scheme, but instead uses "functional types" to classify activities of reporting units. The UI/UCFE industry data are based on the standard classification.

Current Population Survey. The Current Population Survey (CPS) is based on a sample of about 59,500 households, whereas the UI/UCFE series is based on a universe of establishments. The CPS survey counts employed persons, whereas the UI/UCFE program counts encumbered jobs during the reporting period. Consequently, the CPS includes those persons "with a job but not at work" who earn no wages—for example, workers on extended unpaid leave of absence. The UI/UCFE data, on the other hand, exclude unpaid workers. The UI/UCFE covered employment data count separately each job held by multiple job holders. The CPS, however, classifies such workers only in the job at which they worked the greatest number of hours. The CPS counts people at their place of residence; the UI/UCFE program counts jobs at the place of work. The CPS differs from the UI/UCFE program in that it includes self-employed persons, unpaid family workers employed 15 hours or more during the survey period, and a greater proportion of agricultural and domestic workers. The CPS data exclude persons under 16 years old, while the UI/UCFE program counts all covered workers regardless of age.

Current Employment Statistics program. The BLS and State employment security agencies cooperate in the operation of the Current Employment Statistics (CES) program. In the CES program, the State agencies are responsible for preparing current employment estimates for the States and for the major labor market areas in the States, while the BLS is responsible for monthly national estimates. The current CES estimates of employment, average weekly and hourly earnings, and average weekly hours are derived from payroll reports from a sample of over 200,000 establishments. The national and State industry estimates are benchmarked annually to the UI/UCFE covered employment data supplemented by other employment data obtained from various sources, including *County Business Patterns.*

Office of Personnel Management. The Office of Personnel Management (OPM) publishes a statistical series on Federal employment and payrolls with information on employing agencies, types of positions and appointments, and characteristics of employees. Data on Federal employment covered by the UCFE series provide industry, local area, and monthly employment detail not available in the OPM series. These detailed UCFE data are not published, but are available from the Bureau of Labor Statistics upon request. In the OPM series, employment by State is available for December of each year.

Both the UCFE and the OPM data exclude members of the Armed Forces, temporary emergency workers employed to cope with catastrophes, and officers and crew members of some American vessels. The UCFE and the OPM data also differ in other inclusions and exclusions. For example, the UCFE, but not the OPM, counts Defense Department workers paid from nonappropriated funds, employees of county agricultural stabilization and conservation committees, State and area marketing committees, and the Agricultural Extension Service. The OPM, but not the UCFE, counts workers who are not U.S. citizens and who are employed outside the United States and its territories, workers paid on a contract or fee basis, paid patients or inmates of Federal homes, hospitals, or institutions, and student employees of Federal hospitals, clinics, and laboratories. UCFE employment data relates to the payroll period including the 12th of the month while the OPM counts persons employed on the last workday of the month plus all intermittent employees.

Uses of the data

The covered employment and wage data (ES-202 series) are the most complete universe of monthly employment and quarterly wage information by industry at the national, State, and county levels. They have broad economic significance in evaluating labor market trends and major industry developments, in time series analyses and industry comparisons, and in special studies such as analyses of wages by size of employer.

The program provides data necessary to both the Employment and Training Administration (ETA) and the State employment security agencies to administer the employment security program. These data accurately reflect the extent of coverage of the State unemployment laws and are used to measure UI revenues and disbursements; national, State, and local area employment; and total and taxable wage trends. The information allows actuarial studies, determination of experience ratings, maximum benefit levels, and areas needing Federal assistance, and also helps ensure the solvency of the unemployment insurance trust funds. The ES-202 data are used to compute State unemployment rates for workers covered by UI programs, and national averages of these rates. The rates, in turn, at specified levels, trigger federally subsidized extended Unemployment Insurance benefit programs.

The ES-202 data are also used by a variety of BLS programs. They serve, for example, as the basic source of benchmark information for employment by industry and by size of firm in the Current Employment Statistics program (BLS-790). The Unemployment Insurance Address File, developed in conjunction with the ES-202 report, also serves as a national sampling frame for establishment surveys such as the Industry Wage Survey, Area Wage Survey, Occupational Employment Statistics, and other establishment-based programs.

Additionally, the Bureau of Economic Analysis of the Department of Commerce uses ES-202 data as a base for developing a large part of the wage and salary component of national personal income and gross national product. The personal income estimates are instrumental in determining Federal allocation of revenue-sharing funds to State and local governments. The Health Care Financing Administration (HCFA) of the Department of Health and Human Services uses administrative records based on employment and wage data to construct wage indexes as a component for determining reimbursable costs in the Medicare program. The Employment and Training Administration (ETA) of the Department of Labor uses employment and wage data from the ES-202 program as an element in the process of setting wage rates for alien farm workers who are brought into the United States on a temporary basis to harvest agricultural crops.

The ES-202 data are one of the best sources of detailed employment and wage statistics used by business, and by public and private research organizations. State governments often use ES-202 data in econometric models to determine projected income tax revenues. These data also are frequently provided to private companies for use in economic forecasting.

How to obtain employment and wages publications and data

The current *Employment and Wages* may be ordered through the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402. For ordering information call (202) 783-3238. Reports issued prior to 1975 are out of print but file copies may be examined at the BLS Washington office. The publications for 1975 through 1983 are available on microfiche from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22151. You may also call (703) 487-4600. When ordering, please mention the NTIS microfiche number as follows:

Title of publication	*NTIS microfiche number*
1975 *Employment and Wages*	PB83151316
1976 *Employment and Wages*	PB81146029
1977 *Employment and Wages*	PB81146037
1978 *Employment and Wages*	PB82106964
1979 *Employment and Wages*	PB83151324
1980 *Employment and Wages*	PB84121607
1981 *Employment and Wages*	PB84121615
1982 *Employment and Wages*	PB84172600
1983 *Employment and Wages*	PB85191476

Historical machine-readable data are available from the BLS Washington office. The charge for this service varies according to the complexity and volume of the request. Please request data by mail from the Division of Occupational and Administrative Statistics, Office of Employment and Unemployment Statistics, U.S. Department of Labor, Bureau of Labor Statistics, Washington, D.C. 20212. Include the name and telephone number of an individual the Bureau may contact if it has questions.

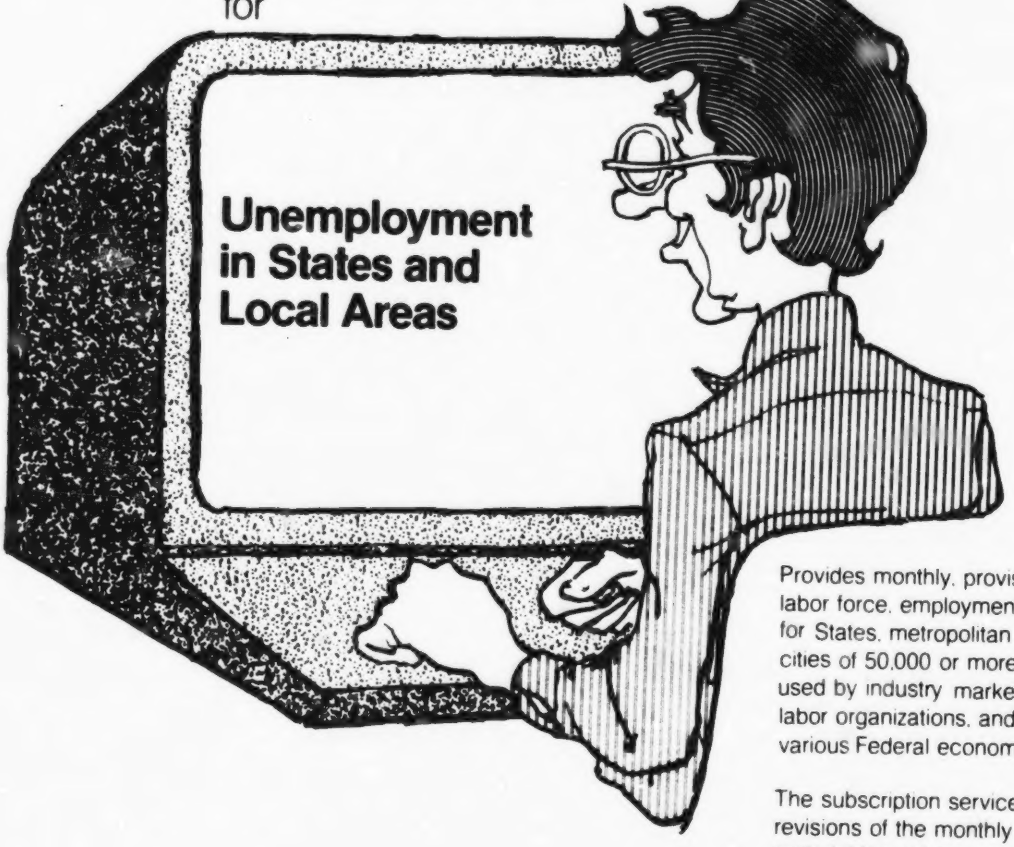
Service
Now Available
for



Unemployment in States and Local Areas

Provides monthly, provisional estimates of the labor force, employment, and unemployment, for States, metropolitan areas, counties, and cities of 50,000 or more. These estimates are used by industry marketing departments, by labor organizations, and by administrators of various Federal economic assistance programs.

The subscription service also includes annual revisions of the monthly data and supplemental material issued on an irregular basis. One year subscription: $50.00
